

CONTI SYNCHROCHAIN[®] Industrial Timing Belts

CONTI SYNCHROCHAIN®.

Finally, you can break free of ordinary chain drives.

With its CTD profile, original design, and unique materials the CONTI SYNCHROCHAIN® was developed for extreme applications where large power outputs, high torques, and high speeds have to be reliably transmitted – or high dynamic stressing is in use. Resistant to dampness, aggressive cleansing agents, and temperature fluctuations, the CONTI SYNCHROCHAIN® is ideal for use in the packing industry, in conveyor belt systems, and in all general drive applications - including go-carts.

A few more reasons to choose the CONTI SYNCHROCHAIN®

- Available in both 8mm and 14mm tooth profiles
- Drop-in compatibility with PCGT2 and RPP® sprockets!
- Allows reverse flexing in multi-pulley drives
- Perfect alternative to chain drives
- Remains stable from -40°F to 212°F (-40°C to +100°C)
- Oils, UV, and ozone resistant

ContiTech Industrial Timing Belts are available in the NAFTA market exclusively from CRP Industrial. For details or samples, call CRP's US headquarters at 800-526-4066.
